

TÜV-Verband Technical Leaflet Steam Boilers
**Directive for the application of fracture
mechanics-based damage tolerance
analysis on pressurised components
for integrity evaluation and
determination of inspection intervals**

MB DAMP 0468-eng:2022-10-20
Replaces MB DAMP 0468:2019-08-15

Contents

1	Preliminary observations	3
2	Reason	3
3	Scope	5
4	Methodology for damage tolerance analysis	7
4.1	Work steps	7
4.2	Prerequisites and preliminary work.....	9
4.3	Explanation of work steps 1 to 6.....	10
5	Fracture mechanics assessment of the findings	19
6	Bibliography	21
6.1	Further reading	21
6.2	Standards and directives	22
Annex 1 (informative): Application of analysis and evaluation of crack-like defects in pressurised vessels and pipelines		25
Annex 2 (informative): Example for determination of the inspection interval N_{Monitor}		26
1	Component geometry	26
2	Load	26
3	Initial defects	26
4	Material properties	27
5	Step 1: Initial crack model	27
6	Step 2: Calculation of the critical and permissible crack depths	28
7	Steps 3 to 5: Fatigue crack growth and determination of the inspection interval N_{Monitor}	28
