

English translation

This translation was presented to the VdTÜV. VdTÜV takes no responsibility for the correctness of the translation. Hints (information) for improvement should be addressed to the VdTÜV. In case of doubt or dispute, the latest edition of the German text only is valid (MB FOER 1507, edition 2013-04).

The German TÜV organisations developed this Code of Practice based on the relevant provisions of the German states and the acknowledged rules of technology.

Some decrees issued by German states reference this VdTÜV Code of Practice.

This Code of Practice is to provide German TÜV experts with a guideline for their work.

Its authors created it to the best of their knowledge. In their view this Code of Practice reflects the state of the art. The requirements included in this Code of Practice establish adequate safety solutions for standard cases. Any liability for the correctness and accuracy of the content of this Code of Practice is excluded. Users are also independently responsible for checking any patents and other industrial property rights.

This Code of Practice will be continuously updated to reflect the state of the art. Please address any ideas and suggestions to the publisher at:
