Table of contents

1	Introduction	5
2	General	5
2.1	Overview and assessment of the legal basis and standards for battery assessment	5
2.2	Factors influencing the degradation of traction batteries	7
2.3	Challenges during the determination of the residual capacity of traction batteries: differences in definition and physical reasons	7
2.4	Parameters that are required for the independent determination of the residual capacity ..	9
3	Requirements for a standardised assessment method to independently determine the residual capacity.....	10
3.1	Requirements for independence	10
3.2	Requirements for a standardised assessment method	10
3.3	Requirements for reproducibility	11
3.4	Assessment of possible methods to determine the residual capacity	12
4	Recommended course of action for the presentation of an independent, standardised and reproducible method to determine the residual capacity	14
5	Benefits of the assessment of the residual capacity	15
5.1	For the monetary assessment on the used car market	15
5.2	For road safety	15
5.3	For circularity.....	15
6	Bibliography	16
7	Table of figures	17
