Contents

Preamble	3
1 Conversion of material groups according to MB SCHW 1153 (1988-11) to CEN ISO/TR 15608.....	3
2 Application of material groups according to CEN ISO/TR 15608 for new suitability tests	4
3 Issues of interpretation regarding suitability testing according to DIN EN 14532 and presentation of results in Welding Consumable Leaflets	6
3.1 Holding time for heat treatment S with “unlimited” wall thickness	6
3.2 Certificate for welding position PB	7
3.3 Determination of the nitrogen content in the chemical analysis of pure weld metal	7
3.4 Specifications for Welding Consumable Leaflets information on unproven materials – P91, P92 and E911	7
3.5 Welding joints with alloy type 18 8 Mn	8
4 Briefings on welding consumables.....	8
4.1 Briefing on welding consumables 004	9
4.2 Briefing on welding consumables 013	9
4.3 Briefing on welding consumables 014	11
4.4 Briefing on welding consumables 017	12
4.5 Briefing on welding consumables 021	14
4.6 Briefing on welding consumables 022	15
4.7 Briefing on welding consumables 025	16
4.8 Suitability testing of creep-resistant welding consumables with L-grade and low-alloy creep- resistant materials.....	16
4.9 Specifications for welding consumables for “proven in use”	17
4.10 Conducting a suitability test	17
4.11 Dealing with duplicates	17
4.12 Application limits for highest and lowest operating temperatures in Welding Consumable Leaflets for welding of aluminium and aluminium alloys.....	17
4.13 Specification of long-term and short-term values	18
4.14 Monitoring for manufacturers of welding consumables and strip electrodes.....	18
4.15 Surveillance of manufacturers/suppliers of ceramic bath fuses	18
4.16 Material group 1.2 – included materials	18
5 Bibliography	19
Annex.....	21
