Any comments or suggestions for improvement should be addressed to the TÜV-Verband. In the event of any doubt or dispute, the German text shall prevail.

Preamble

The list comprises all manufacturers of metallic materials which have been inspected, before the date of issue, by an expert of a Technical Supervisory Organisation (TÜO)*).

It is re-published biannually.

The manufacturers listed in this TÜV-Verband Technical Leaflet meet the requirements of AD 2000-Merkblatt W 0.

The information given in the "Products" and "Materials" columns describes the respective manufacturer's production departments. It does not describe all of the manufacturer's available production opportunities and does not purport to be exhaustive. Thus, as far as the relevant delivery opportunities are concerned, the manufacturer should be contacted.

The "Products" column comprises only those types of products which are listed in the Technical Rules for Installations requiring Surveillance (e. g. pressure vessels, steam boilers, tank installations) (see pages 4 and 5).

Regarding the permissibility of materials and their limit dimensions, the respectively valid body of technical rules and regulations is relevant (e. g. AD 2000-Merkblätter of the W series, DIN EN 13445-2, DIN EN 12952-2, PED). As far as further materials are concerned, for which a declaration of suitability is available for the respective manufacturer, reference is made to the TÜV-Verband Material Leaflets.

The Technical Leaflet Materials 1253-1 has been prepared as a guideline. It does not lay any claim to completeness. Content-related information is based on information provided to the editor by the involved TÜO (see page 5). The publisher and the editor publish this information in all conscience. However, liability for any kind of error shall be excluded, except in case of intentional and grossly negligent conduct.

*) Technical Supervisory Organisation, which is a member of the TÜV-Verband.
